Name : Vedvyass M

Reg no : 192324267

27. Python Program – Bar Chart of Programming Language Popularity

Code :

```
import matplotlib.pyplot as plt

# Sample data
languages = ["Java", "Python", "PHP", "JavaScript", "C#", "C++"]
popularity = [22.2, 17.6, 8.8, 8.8, 7.7, 6.7]

# Create bar chart
plt.bar(
    languages,
    popularity,
    color="blue")

# Add title and labels
plt.title("Popularity of Programming Languages")
plt.xlabel("Programming Languages")
plt.ylabel("Popularity")

# Add grid
plt.grid(axis="y", linestyle="--", alpha=0.5)

# Display chart
plt.show()
```

OUTPUT :

28) Python Program – Horizontal Bar Chart

Code :

```
import matplotlib.pyplot as plt
```

```
# Sample data
```

```
languages = ["Java", "Python", "PHP", "JavaScript", "C#", "C++"]
```

```
popularity = [22.2, 17.6, 8.8, 8.8, 7.7, 6.7]
```

```
# Create horizontal bar chart
```

```
plt.barh(languages, popularity, color="green")

# Add title and labels
plt.title("Popularity of Programming Languages")
plt.xlabel("Popularity")
plt.ylabel("Languages")

# Add grid
plt.grid(axis="x", linestyle="--", alpha=0.5)

# Display chart
plt.show()
```

OUTPUT :

29) Python Program – Bar Chart with Different Colors

Code :

```
import matplotlib.pyplot as plt

# Sample data
languages = ["Java", "Python", "PHP", "JavaScript", "C#", "C++"]
popularity = [22.2, 17.6, 8.8, 8.8, 7.7, 6.7]

# Different color for each bar
colors = ["red", "black", "green", "blue", "yellow", "cyan"]

# Create bar chart
plt.bar(
    languages,
    popularity,
    color=colors
)

# Add title and labels
plt.title("Popularity of Programming Languages")
plt.xlabel("Languages")
plt.ylabel("Popularity")

# Add grid
plt.grid(axis="y", linestyle="--", alpha=0.5)

# Display chart
plt.show()
```

OUTPUT :
